Appraisal of Maps of Southwest Japan

(Kyūshū, Shikoku, and Honshū south of 36° N and west of 138° E)

1. International Map of the World, 1:1,000,000; Japanese Imperial Land Survey, 1927-1937.

Three sheets of this series, published by the Land Survey, cover all of Southwest Japan. The sheets were compiled from original Japanese sources such as the 1:200,000 and 1:500,000 maps and Japanese Imperial Admiralty Charts. Relief is shown by gradient tints. The English text is Romazi transliteration. The series is generally reliable considering the scale but is not as up-to-date as the Eastern Asia series by the Army Map Service at the same scale.

2. Eastern Asia, 1:1,000,000; Army Map Service, 1944.

Three sheets, based on the sheet layout of the International Map of the World, cover Southwest Japan. The sheets were compiled from Japanese sources and were corrected in part from supplemental intelligence. The English text is Romazi transliteration. Relief is shown by gradient tints. Important details are considered factually correct.

3. Japanese Naval Air Chart, 1:500,000; Imperial Japanese Navy, 1937-38.

Four sheets cover Southwest Japan. They were compiled from Japanese sources with corrections from Japanese Hydrographic Charts to 1938. This series was reprinted by the Army Map Service and issued in 1941 with airfield and seadrome information corrected to 1940. It shows relief by hill shading, and the AMS reprint has a somewhat inaccurate English transliteration overprint.

4. Central Japan, 1:250,000 (AMS L571); Army Map Service, 1943-1944.

Thirty-nine sheets covering the entire area of Southwest Japan are part of a larger series covering all of Japan proper, Formosa, and Korea. The series was compiled from Japanese Imperial Land Survey maps, 1:50,000 and 1:200,000 dated 1910 to 1939; Japanese Hydrographic Charts dated 1925 to 1935; U. S. Hydrographic Charts dated 1925 to 1943 and was corrected from Military Intelligence information to 1943. Relief is shown by contours except in limited areas where contours are omitted on the original Japanese sources. English Romazi is based on transliterations from the 1:50,000 Japanese Imperial Land survey maps. Communication information is questionable at little up-to-date information is available. Topography, control, and population breakdown is dependable.

5. Japanese Empire, 1:200,000; Japanese Imperial Land Survey, 1890-1939.

Approximately 47 sheets cover all of Southwest Japan. These sheets were compiled from survey at the scale of 1:50,000 or larger. Relief is shown by contours and hill shading (green) combined. Text is Japanese. This series, together with the

1:50,000 by the same publisher, is the most reliable complete coverage of the Japanese maps.

6. Japanese Empire, 1:200,000; Japanese Imperial Geological Survey, 1891-1921.

Approximately 34 sheets cover two-thirds of the area and are based on topographic surveys by the Imperial Land Survey and on geological surveys. Relief is shown by contours and certain areas are contoured on these older sheets which are not so treated on the later Imperial Land Survey 1:200,000 and 1:50,000 maps. Text is partially Japanese and partially English (Romazi).

7. Japanese Empire, 1:75,000; Japanese Imperial Geological Survey, 1922-1939.

Approximately 55 scattered sheets on Southwest Japan are based on Topographic Surveys and show areal geology. Relief is by contours and text is both Japanese and English.

8. Japanese Empire, 1:50,000; Japanese Imperial Land Survey, 1897-1940.

Southwest Japan is entirely covered by this series with the exception of a few missing sheets. The sheets are based on large scale surveys and show accurate delineations. Relief is by contours except in limited Japanese restricted areas. Text is Japanese. This series, together with the 1:200,000 series by the same agency, is the most reliable complete coverage of the Japanese maps.

9. Kyūshū, 1:50,000 (AMS L772); Army Map Service, 1944.

Reprints in black and white with grid, transliteration, and border information overlay in purple for all of Kyūshū are published by the Army Map Service. Other similar series are being prepared by AMS (Central Honshū, L774 and Southern Honshū, L775).

10. Japanese Empire, 1:25,000; Japanese Imperial Land Survey, 1911-1938.

Partial coverage (approximately 450 sheets) is available on Southwest Japan. Topography is shown by contours and all details are from survey at 1:25,000. Text is Japanese. For the limited areas covered, these maps are considered dependable but not up-to-date.

11. Central Honshū and Southern Honshū, 1:25,000 (AMS L874 and L875); Army Map Service, 1944.

Sixty-five sheets are in process of being redrafted from the original Japanese sources and cover scattered areas, mainly around important settlements.

Note: Place names on maps of Japan show considerable discrepancy between the different scale series. In each case the place names have been transliterated from Japanese maps of approximate equal scale. The Japanese custom of indicating the names of small individual settlements on large scale maps (1:50,000) but only names of village groups (or *muras*) on small scale maps (1:1,000,000) is the cause of this discrepancy. The AMS 1:250,000 (L571) has been used as standard for place names in JANIS 84.

15 September 1944.

MEMORANDUM

Subject: JANIS 84.

1. Joint Army-Navy Intelligence Study of Southwest Japan (Kyushu, Shikoku and Southwestern Honshu) is promulgated herewith.
2. This is a confidential non-registered publication. However, some of the chapters are classified restricted. This has been done to facilitate their distribution among interested personnel. The confidential chapters contain information affecting the national defense of the United States within the meaning of the Espionage Act, 50, U.S.C. 31 and 32, as amended. Their transmission or the revelation of their contents to an unauthorized person is prohibited by law.
3. When complete, JANIS 84 will comprise Chapters I to XV, inclusive, (less Chapter X) and a Plans Pouch containing reference maps. Chapter X (People and Government) will be published later, and will be prepared for common use in JANIS 84, 81 and 85.
4. As a means of expediting distribution, the various chapters will be issued as they come off press, not necessarily in numerical order.
5. At the time of this distribution the following chapters are issued:
 - Chapter VIII - Cities and Towns
 - Chapter XI - Health and Sanitation (Restricted)
 - Chapter XII - Defenses
6. It is anticipated that, with the exception of Chapter XV, the issue will be complete by 1 October 1944. As the several chapters are received, they should be arranged in numerical order in the binder provided, and date of receipt entered in the spaces below. Titles of the remaining chapters will be:
 - Chapter I - Brief
 - Chapter II - Military Geography
 - Chapter III - Oceanography
 - Chapter IV - Coasts and Landing Beaches
 - Chapter V - Climate and Weather
 - Chapter VI - Port Facilities
 - Chapter VII - Transportation and Communications
 - Chapter IX - Resources and Trade
 - Chapter XIII - Naval Facilities
 - Chapter XIV - Air Facilities
 - Chapter XV - Gazetteer and Map Appraisals (Restricted)
7. The effective pages of each chapter are listed inside the chapter covers. A list of the plans is issued with the Plans Pouch. A combined List of Effective Pages will be included with the final distribution.
8. The distribution of this publication to naval activities is effected through the Registered Publications Issuing Offices, and requests for copies not included in registered publication allowance tables should be addressed to the Division of Naval Intelligence. The War Department will distribute this publication to army units, and requests from army units should be directed through army channels.
